

Salvis Marmite braising and cooking unit – compact and multi-functional

The multi-functional Salvis Marmite braising and cooking unit achieves truly great things.

Every kitchen will benefit from its power and compact dimensions.

Oftringen, 3 February 2017: The Salvis Marmite is very easy to clean thanks to the quality of its design and materials and the seamless, deep-drawn CNS pan with large radii. The robust design guarantees long service life, even if used intensively day after day. The versatile unit has a Gastronorm size GN 2/1 interior and can be used for frying, steaming, boiling and stewing.

The multi-layer pan bottom conducts heat very effectively and is the perfect heat retainer for frying.

The ground CNS frying surface guarantees excellent frying and browning results with minimal temperature losses.

Easy to operate with power selection switches for 4 levels from 33% to 100%, the Salvis Marmite is the perfect choice for a range of tasks from careful steaming and keeping warm to intense cooking and frying. Custom selection of the power level to match your quantity and cooking method make it an energy-saving choice as well. The 2/3 - 1/3 split of the heating surface optimises the production flow, as one part can be used as a warming surface.

Fixed, mobile or installed on base

Whether mobile for catering or permanently installed on a base with optional GN transport trolley, choose the setup that meets the demands of your kitchen. In "offline" mode, the double-insulated cover can be used as a work surface to maximise space as well.

Salvis Marmite 800 Plus W with integrated manual water supply

Innovative and space-saving. 800 Plus W model comes with integrated water supply. The water supply is installed in the lid hinge, so no space is wasted and the unit is completely hygienic.
